Google systems have detected that some downloadable files on your site might contain malware or unwanted software. To protect your site's visitors, browsers such as Google Chrome now display a warning when users visit or click links to download these files from your site.

Act now to fix this problem and remove the warning:

- 1 Identify problematic URLs

[View Examples](#)

Check the example URLs in the "Security Issues" page in Search Console. Note that this page displays a list of samples and not an exhaustive list of problematic URLs. Do not click the URLs for risk of infecting yourself with malware.
